SUMMARY

I build classy, animated web experiences that shouldn't work, but somehow do. As a BCA graduate, I don't just write code — I craft digital aesthetics. My vibe is Minimalist Heritage: clean lines, premium feels, and zero lag. Currently building Prompt Forge — turning "meh" prompts into high-precision AI fire for Midjourney and GPT.

EXPERIENCE

Project
Dec 2024 – Apr 2025

Karnataka Lions Cricket Academy

- Created a dynamic website using HTML, CSS, SQL, and XAMPP
- Managed player registration and structured data storage
- Prepared the application for live deployment on a local server

Software Development Intern
Aug 2024 – Sep 2024

EGAI SOFT

- Optimized Python data structures, reducing retrieval time by 20%
- Improved data processing performance by 30%
- Automated workflows for 5+ tasks with a command-line app

AI Development Intern
Dec 2023 – Jan 2024

OctaNet Services Pvt Ltd

- Conceptualized 4 AI projects, boosting output by 40%
- Contributed to an AI chatbot achieving 95% accuracy
- Developed an AI dashboard using Flask, HTML, CSS, and JavaScript

IoT & Data Intern
Jun 2023 – Jul 2023

Bolt IoT

- Improved database query execution time by 25%
- Enhanced data accuracy by 15% through better data handling
- Achieved 100% project completion on schedule

EDUCATION

Bachelor of Computer Applications (BCA)

2022 – 2025

Jyoti Nivas College Autonomous, Bangalore

Focus: Computer Science, Data Structures, Software Engineering, AI Systems

SKILLS

Languages: Python, JavaScript, HTML, CSS, SQL

Backend: Flask, Express, XAMPP, Node.js

AI: Prompt Engineering, AI Chatbots, AI Dashboards

Frontend: React, Vite, Tailwind CSS, Framer Motion

Design: Figma, Photoshop, UI/UX, Wireframing

Other: Full-Stack Dev, Database Design, Git

CURRENT PROJECT

Prompt Forge

A platform transforming mediocre prompts into high-precision AI inputs for Midjourney and GPT. Architecting the complete user experience and developing the underlying AI automation logic using Python and React.
